What does this fund invest in?

The Equitable Income fund will actively manage allocations between multiple asset classes based on the relative appeal of each based on economic and market conditions and the portfolio manager's outlook for each asset class. The portfolio manager may use a variety of analytical methods, including fundamental and technical analysis, to establish the positioning of the fund. The portfolio may assume limited exposures to commodity related investments or other alternative asset classes. Exposures to fixed income will generally be via holding units in the Equitable Bond fund. Investments in equities and other asset classes will be achieved primarily through the use of exchange traded funds.

The objective of the fund is to provide both income and capital appreciation by investing in a diversified portfolio of fixed income and equity investments.

Ongoing fund expenses

The MER includes the management fee and operating expenses of the fund. It also includes the insurance cost for the Investment Class. You don't pay these expenses directly but they will reduce the return on your investment. An additional cost applies to the Estate Class and the Protection Class and is paid out of the contract each month which leads to a slightly lower net rate of return. For details about how the guarantees work, please refer to the contract and information folder.

Trailing commission

Equitable pays your advisor a trailing commission of up to 1.0% for as long as you own the fund. It is for the services and advice your advisor provides to you. The trailing commission is paid out of the management fee. You don't pay these expenses directly.
