Equitable

Equitable Balanced

Fund Overview

The Equitable Balanced fund will actively manage allocations between multiple asset classes based on the relative appeal of each based on economic and market conditions and the portfolio manager's outlook for each asset class. The portfolio manager may use a variety of analytical methods, including fundamental and technical analysis, to establish the positioning of the fund. The portfolio may assume limited exposures to commodity related investments or other alternative asset classes. Exposures to fixed income will generally be via holding units in the Equitable Bond fund. Investments in equities and other asset classes will be achieved primarily through the use of exchange traded funds.

The objective of the fund is to provide both capital appreciation and income by investing in a diversified portfolio of fixed income and equity investments.

Fund Information

Description	Guarantee Fee	DSC	Level NL
Pivotal Solutions	-	EQU537	EQU337
Personal Investment Portfolio	-	EQU137	-

Sustainable Investments include investments that intend to apply one or more ESG (Environmental, Social and Governance) principles in their investment strategy.

* Simulated returns estimate how the segregated fund would have performed if the fund had been active during the periods shown. They are based on the underlying fund's historical returns and adjusted for the segregated fund's applicable fees.

† Management Expense Ratios (MERs) are estimated for the current year and are unaudited. MERs may vary at any time.

Equity and fixed income breakdowns are based on the most recent data available.

All returns are calculated after taking MERs into account, but do not include the effect of guarantee fees.

Any amount that is allocated to a segregated fund is invested at the risk of the owner and may increase or decrease in value. Segregated fund values change frequently, and past performance or simulated performance does not guarantee future results.
